

Invitation for Dry needling, Manual therapy, Musculoskeletal (MSK) and cosmetic acupuncture workshop and Sport Rehabilitations master class

Manual therapy has a long history within the profession of physical therapy and physical therapists have greatly contributed to the current diversity in manual therapy approaches and techniques. In recent years, manual therapy has been employed by many developed countries such as U.S.A and Canada as well as different European countries. Mechanical therapies are replaced by person-centered therapies and personal skills overvalue the mechanized treatments with excessive costs.

Recognizing the critical need for physical therapists to acquire knowledge of this skills and abilities, it is our pleasure to notify you that our institute, ESMT, under the supervision of international branch of European college of medicine and care is organizing and implementing different programs and activities on subjects of various modern therapies including:

- ☐ •an 9- day training program and workshop of Manual therapy in 3 levels,
- ☐ •a 9-day program and workshop about Dry Needling in 3 levels
- ☐ •a 2-day training about cosmetic acupuncture and scar needling
- ☐ •a 3-day program of musculoskeletal acupuncture. (More detailed schedule of these 30-day

courses are attached.)

You also have this opportunity to choose different courses and levels of different programs concerning your interests and application.

The workshop will be conducted by Physical Therapist Dr. Mehrdad Bahramian in English (the resume is attached for your review).and Dr. Ghahreman Divanbeigi and other European trainers.

The program`s Target group are mainly physical therapists, however other interested Physiatrist, Orthopedic surgeons, general practitioners, occupational therapists are welcomed to attend the program.

The objective of the program is training the participant how to make use of manual therapy. The program will be based on the most recent and up to date documents about manual therapy and practical body biomechanics, Dry Needling and musculoskeletal acupuncture along with many case reports. Each

class will consist of 15 to 25 participants and use

interactive teaching techniques. The participants would experience an energetic, scientific

and practical program that we guarantee would have a significant role in their professional

career henceforward. At the end of the workshop, the participants are expected to award a

certificate signed by caller institute and/or ministry of health

theoretical and practical exam.

provided to all participants thereafter.

of the country, following final

Additional details about the Final Agenda will be Taking into consideration that our programs (workshops) are adaptable and flexible.

concerning the demands and requests of our participants, please do not hesitate to inform us about any remodeling or changes in the program.
